## About Me

Versatile and results-driven developer with **over 5 years** of experience in web development. Passionate about crafting innovative solutions, maintaining several **open-source projects**, and demonstrating expertise in both front-end and back-end technologies.

## Skills

I have extensive experience with **React**, **Next.js**, and **JavaScript**, complemented by proficiency in back-end technologies like **Node.js**, **Express**, and **Django**. My expertise also includes working with various database systems, both relational and non-relational, enabling me to build robust, full-stack applications.

## Experience

February 2021 - Present

**Artus Interactive** - *Full Stack Web Developer*

- Worked on various scripts to reduce the workload and automate processes.
- Developed and refactored large code-bases for **Braun**, **Henkell**, **Head&Shoulders**.
- Implemented advanced CSS animations to enhance user engagement and create dynamic, visually appealing interfaces.
- Communicated and worked with people across many different countries and cultures to meet business goals.

October 2020 - February 2021

**CamelWeb** - *Front-end Developer*

- Facilitated the seamless migration of a large P&G brand website from Gatsby to Next.js, significantly enhancing performance, scalability, and maintainability.
- Developed multiple React components and layouts for the same brand.

April 2019 - May 2020

**ProFotoVideo** - *Full Stack Web Developer*

- Solely responsible with the development and maintenance of a Django-powered website.
- Optimized performance by implementing lazy loading and automatic thumbnail creation for image uploads, effectively addressing performance bottlenecks and reducing user bounce rates.

October 2018 - April 2019

**ColorMedical** - *Full Stack Web Developer*

- Solely responsible with the development of a medical clothing website, which includes a custom CMS built from scratch, a REST API with authentication functionality and a React front-end.
